This report contains background radiation measurements from across Missouri in 1979 that may be useful in setting the definition of RIM at WLL. It is from the following document. It was forwarded to me by one of our constituents.

She copied the survey results to the Word doc (attached).

Page 17 and 18 of 124: Explanation on how the samples were taken.

Harvey;

Here is the report I was telling you about that includes the samples taken across the State of Missouri for background levels. This report was dated September 1979.

The report: Formerly Utilized MED/AEC Sites Remedial Action Program - Radiological Survey fo the St. Louis Airport Storage Site, St. Louis Missouri September 1979 - Final Report is 124 pages long but hopefull it will give want we are needing to show the difference between the background levels of 1979 to the background levels of today.

I pulled out the pages in question to a word.doc but I did attach the entire report.

Page 17 and 18 of 124: Explaination on how the samples were taken

Page 37 for map showing locations in the State of Missouri where samples were taken

Page 41 for the results of the samples taken.

Please let me know if you have any questions.

Debi
